This listing of the claims will replace all prior versions and listings of claims in the application:

**Listing of the claims:**

Claim 1 (previously presented): A patch preparation comprising a support and an adhesive base, the adhesive base containing 8 to 50 mass % relative to total amount of the adhesive base of a rubber-system macromolecule having a double bond at least in a principal chain thereof and 0.1 to 10 mass % relative to entire amount of the preparation of a nonsteroidal anti-inflammatory analgesic drug, and the adhesive base further containing 0.5 to 20 mass % relative to entire amount of the preparation of 4-tert-butyl-4'-methoxydibenzoylmethane as a stabilizer for the rubber-system macromolecule.

Claim 2 (previously presented): The patch preparation according to claim 1, wherein the rubber-system macromolecule having a double bond at least in a principal chain thereof is selected from the group consisting of a styrene-isoprene-styrene block copolymer, a styrene-butadiene-styrene block copolymer, a styrene-butadiene copolymer, polyisoprene, and polybutadiene.

Claim 3 (previously presented): The patch preparation according to claim 1, wherein the nonsteroidal anti-inflammatory analgesic drug is selected from the group consisting of ketoprofen, tiaprofenic acid, suprofen, tolmetin, carprofen, benoxaprofen, piroxicam, meloxicam, benzydamine, naproxen, felbinac, diclofenac, ibuprofen,

diflunisal, azapropazone, etodolac, valdecoxib, celecoxib, rofecoxib, and pharmaceutically acceptable salts thereof.

Claims 4-6 (canceled)

Claim 7 (previously presented): The patch preparation according to claim 1, wherein it contains 2 to 10 mass % relative to entire amount of the preparation of the UVA blocker and/or the UVB blocker in the adhesive base.

Claims 8-10 (canceled)

Claim 11 (previously presented): The patch preparation according to claim 1, wherein it contains zinc oxide or titanium dioxide.

Claim 12 (previously presented): The patch according to claim 1, wherein a tackifier added to the adhesive base is one or more types selected from a rosin ester, a hydrogenated rosin ester, a maleic acid-modified rosin ester, a terpene resin, and a petroleum resin.

Claim 13 (previously presented): The patch according to claim 12, wherein the tackifier added to the adhesive base is a combination of a hydrogenated rosin ester and a terpene resin.

Claim 14 (previously presented): The patch according to claim 12, wherein the amount of tackifier added is 10 to 20 mass % relative to the total amount of the adhesive base.

Claim 15 (previously presented): The patch according to claim 3 wherein the nonsteroidal anti-inflammatory analgesic drug is ketoprofen.
